## COVID-19 PUBLIC HEALTH NOTICE

**August 31, 2021** – Swinomish Public Health has confirmed **seven (7) new cases** of COVID-19 in the community since the last update Monday, August 23. There are tests results still pending.

**WHAT IS QUARANTINE?** Quarantine describes when someone who has been **exposed to COVID-19** stays home and away from others for the recommended period of time in case they were infected and are contagious to others. The following outlines quarantine timelines based on vaccination status:

Vaccination Status	When to Test	Quarantine Period	Restricted from Swinomish gatherings, buildings, and community contact
<b>Fully Vaccinated</b>	Test 3-5 days after exposure	7 days if you remain symptom free and receive a negative COVID-19 test	14 days
<b>Not Vaccinated</b>	Test at the onset of symptoms. If you experience no symptoms, test 3-5 days after exposure	Best: 14 days after the last close contact, even if no symptoms develop  Acceptable: 7 days after the last close contact, even if no symptoms develop. In order to leave quarantine, receive a negative test result on or after day 7.	14 days
<b>Partially Vaccinated</b>	Test at the onset of symptoms. If you experience no symptoms, test 3-5 days after exposure	Best: 14 days after the last close contact, even if no symptoms develop  Acceptable: 7 days after the last close contact, even if no symptoms develop. In order to leave quarantine, receive a negative test result on or after day 7.	14 days

**WHAT IS ISOLATION?** Isolation describes when someone who has **COVID-19 symptoms or has tested positive** stays home and away from others (including household members) to avoid spreading their illness. Regardless of vaccination status, isolate from others and get tested if you have symptoms of COVID-19. Isolate for at least 10 days if you test positive.
